6th Webinar on General Insurance Analytics in General Insurance (Online Series October 2021)

Group: Advisory Group on General Insurance

Date & Time: 28th and 29th October, 2021 (Thursday-Friday)

Time: 02-00 PM to 05-00 PM - Indian Standard Time

CPD: 6 hrs Technical (General Insurance practice Area as per APS 9-Rev. Ver 3)

Mode: Zoom Webinars

Target Audience: Fellows, Associates, Affiliates, Students across domains, All the analytics & technology professionals, CTO's, CRO's, Consultants, Academicians, Targeted across the world

Background: The objective of the webinar is to create awareness amongst the actuarial members and anybody interested, about the relevance and use of analytics and machine learning in the field of general insurance. Actuarial skillsets are diverse and there are new emerging fields which have started employing the Actuarial professionals. At the same time the traditional domain of Actuarial professionals in general insurance is also getting challenged by other professionals more proficient in these emerging domains of Artificial Intelligence / Machine Learning.

However, there is a lack of awareness among Actuaries regarding such emerging fields, the opportunity and challenges it provides. These webinars aim to provide an opportunity to our members to interact with Industry professionals and experts from across the world to provide a Global Perspective.

The content would appeal to a non-actuarial audience as well.
