Background: The objective of the webinar is to create awareness among the actuarial members and anybody interested in the field of Data Science, Analytics, and disruptive technology on the convergence of actuarial science with data science. Actuaries have long been viewed as Insurance and Pension specialists. However Actuaries are professionals with multi-dimensional skillsets like mathematics, statistics, accounts, modelling and business. Actuaries can also be called as the earliest data scientists who have been applying modelling and analytics on data and deriving business insights. The advent of Big Data Analytics and Data Science domain coupled with technological revolutions like machine learning, artificial intelligence, etc. have enabled the exponential possibilities for actuaries to contribute beyond the traditional domain. This webinar will help participants to understand and appreciate the current developments in the field of Data Science and analytics in various domains and enable them to apply actuarial knowledge with a novel touch. The participants will have an opportunity to interact with Industry experts, practitioners and technology experts working in leading organizations. The content would appeal to a non-actuarial audience as well.
